PROFESSIONAL SUMMARY

Telecommunications Engineer with 4+ years as a Service Desk Analyst at Dígitro Tecnologia (Brazil), providing remote support, resolving incidents and monitoring mission-critical environments for public-sector clients. Educated in Venezuela, I started my career in the Anzoátegui oil and gas industry (PDVSA). I also design and build software with artificial intelligence: production web systems, automations and API-based tools, driven by prompt engineering and AI agents. I combine a technical background in networking and Linux with the ability to turn a business problem into a working tool.

SKILLS

Artificial intelligence	Prompt engineering · AI agents (Claude Code, MCP) · Claude, ChatGPT and Gemini · Task automation · AI API integration
Development	React · JavaScript · PHP 8 · Python · SQL (MySQL, PostgreSQL, Oracle) · HTML/CSS · Git and GitHub · REST APIs
Infrastructure & networking	Linux (Red Hat, Debian) · Bash · SSH · Apache Tomcat · IP/MPLS networks · Digital telephony and PBX · Environment monitoring
Support & management	Incident and ticket management · Remote support and troubleshooting · Project management (Agile, Google PM)

WORK EXPERIENCE

Service Desk Analyst
Apr 2022 – Present

Dígitro Tecnologia · Florianópolis, Brazil (hybrid)

- Remote support to accredited technicians and public-sector clients (security departments, police forces and prosecutors in Brazil and abroad).
- Incident resolution and escalation, logging every case and following it through to closure.
- Remote monitoring of technology environments (Dígitro and third-party equipment): alert analysis, trouble tickets and recovery actions.
- Execution of Production Orders in deployment and expansion projects: specifications, system configuration and resources.

AI Solutions Developer (freelance)
2026 – Present

Own and client projects · Remote

- Built, with AI agents, production web systems for a steel structures company: a finance system with PDF quotes and invoicing, and a project calculator with drawings, bill of materials and 3D view.
- Automated a blog that writes and publishes one article per week, notifies Google and Bing and emails a report.
- Digital marketing tools: an AI-powered Google Ads ad generator and keyword research through the Google Ads API.
- React, PHP, MySQL and Python; version control on GitHub (1,400+ commits in 2026) and deployment to a Linux server over SSH.

Technical Support Engineer
Jan 2018 – Dec 2018

T-Protege F.D. · El Tigre, Venezuela

- On-site technical support: diagnosis and troubleshooting of IT systems, and support for technology projects.

Telecommunications Analyst (Intern)
Sep 2017 – Dec 2017

PDVSA · San Tomé, Venezuela

- Support for telecommunications and IT operations at Petropiar well pads, in the Orinoco Oil Belt.

EDUCATION

Bachelor's Degree in Telecommunications Engineering
UNEFA · San Tomé, Venezuela · 2010 – 2016

LANGUAGES

Spanish (native) · Portuguese (fluent) · English (intermediate)

CERTIFICATIONS & COURSES

- Google Project Management – Google/Coursera (2023)
- LPIC-1: Linux Administrator (2023)
- Artificial Intelligence with ChatGPT – Udemy
- Guardião On-line: Data Analysis – Dígitro (2022)
- Bash: Linux Command Interpreter
- Traffic Engineering in IP/MPLS Networks
- IP Backhaul Networks
- Computer Networking
- Digital Telephony
- PABX Administrator 3
- Intelletotum ID: Access, Management and Audit
- UNA: Operation and Administration
- Tower Climbing and Rescue
